

MEET OUR SENIOR STAFF MEMBERS

Dr. Kathryn Marr

Kathy is a 1986 graduate of the U of M where she received her Doctor of Veterinary Medicine Degree. She has worked in various small animal hospitals in the metro area. Before becoming a doctor she worked as a veterinary technician up on the Iron Range where she grew up. Kathy also worked as a surgical technician for a veterinary surgical specialist while attending veterinary school. With the help of her parents, she built her dream clinic, borrowing the best ideas from the various hospitals that she had worked at. The result is Maplewood Pet Care Clinic, a modern, service oriented clinic and boarding facility.

Angie Marose, C.V.T., Practice Manager

Angie graduated from Argosy University in October of 2003 where she earned her Associates of Applied Science in Veterinary Technology. She completed her internship at MPCC then continued as a full-time employee. She passed her certification test in January of 2004. Angie is a full time Certified Veterinary technician and one of the Practice Managers. She has been at Maplewood Pet Care Clinic since January of 2003.

Lisa Stevens, C.V.T., Practice Manager

Lisa graduated from Globe College in June of 2004 receiving her Associates of Applied Science in Veterinary Technology. She completed her internship at MPCC and stayed on after graduation. She passed her certification test in June of 2004. Lisa is a full time Certified Veterinary technician and one of the Practice Managers. She has been at Maplewood Pet Care Clinic since April of 2004.

Prices subject to change

MAPLEWOOD PET CARE CLINIC is a full service veterinary hospital and boarding facility dedicated to providing the most up-to-date veterinary care possible in a family-oriented setting.

PREVENTIVE & WELLNESS CARE

The following is a breakdown of the most common preventive services that we offer.

ANNUAL PHYSICAL EXAM \$59.00

A complete physical exam is very important to your pet because on the average your pet ages 7 years to our 1. Changes in body conditions can occur rapidly and need to be evaluated by a veterinarian. When diagnosed in the early stages of onset many diseases can successfully be treated before permanent damage is done to your pet.

RABIES VACCINES \$29.00

The first time your pet receives a Rabies vaccine it is good for one year and then is boosted at 3 year intervals.

CANINE VACCINES

DHPP-C	\$32.00	Lepto	\$ 15.00
Bordetella	\$27.50	Lymes	\$ 32.00

Heartworm Antigen Test \$50.00

Per the recommendations of the American Heartworm Society, we recommend regular, every year heartworm antigen testing in dogs who are given one of the approved monthly (or 6 month) heartworm preventive products as directed.

Heartworm 4DX Test.....\$60.00

Screens for Heartworm disease, Lyme disease, anaplasmosis and ehrlichiosis.

FELINE VACCINES & WELLNESS TESTING

After the initial kitten series is completed we will customize your cat's vaccine protocol based on your cat's risk factors. For low risk, indoor only cats this will involve vaccination at 3 year intervals. We also recommend periodic testing for Feline Leukemia (FELV) and Feline Aids (FIV). This new protocol is endorsed by the American Association of Feline Practitioners along with Cornell Feline Health Center. We have several products available for the prevention of heartworm, intestinal parasites, fleas and ticks for cats and we will help you choose the appropriate product(s) for your cat's lifestyle.

PCR	\$32.00	FELV	\$28.00
Bordetella	\$24.00	FELV test	\$45.00
FIV/FELV Combination Test	\$55.00		
Calici Virus.....	\$19.00		

PARASITE PREVENTION

Intestinal Parasite Exam	\$38.00
Cat Deworming	\$10.50-\$21.50
Dog Deworming	\$10.50-\$36.75

Per the recommendations of the Centers for Disease Control, we recommend regular deworming and/or regular fecal exams for the detection of intestinal parasites in dogs and cats. Some animal worms can be spread to humans, particularly small children thus making internal parasite control in our pets especially important.

MEDICAL SERVICES

Medical Exam charges are \$75.00.

In order to ensure the best medical care, we have equipped our hospital with the following:

- IV Pumps to deliver intravenous fluids.
- Heated kennels to ensure optimal body temperature.
- Isolation ward to prevent the spread of infectious diseases.
- Small animal x-ray unit and automatic processor.
- In-house laboratory.
- Laser Surgery Unit.
- EKG and pulse oximeter monitor and blood pressure.

In the past we would refer you to the U of M for most advanced diagnostic and surgical services. Although that option is still available, you have the option of having the specialist come here to MPCC for diagnostic and surgical services such as: Orthopedic Surgery, Ultrasound and Endoscopy. With modern communication capabilities we have access to Board Certified Specialists for cardiology and internal medicine consultations.

EMERGENCY SERVICES

There are several Emergency Clinics in the area. Call the U of M at 612-625-9711 or the Animal Emergency Clinic in Oakdale at 651-501-3766.

LASER SURGERY

In many procedures, the laser can replace the scalpel and provide a better alternative to traditional surgery. Laser technology reduces the trauma to your pet, improves recovery and often shortens hospital stays. The laser seals nerve endings and blood vessels as it moves through tissue so your pet feels less pain post-operatively. Laser energy does not crush, tear or bruise. The laser sterilizes tissue, killing bacteria that may cause infection. This method is ideal for cat declaws as well as skin lump removals.

SURGICAL & DENTAL SERVICES

MPCC has taken great care in setting up our surgical suite and protocols for the safety of your pet. We believe that certain precautions need to be taken before general anesthesia is administered. We will provide you with a surgery quote and an in depth brochure that will walk you through your pet's surgical procedure. All pets undergoing surgery will be continually monitored by a veterinary technician as well as a sophisticated monitor for the following:

- Oxygen saturation in the blood
- Pain
- EKG
- Pulse Rate
- Respiratory Rate

Every patient is evaluated on an individual basis; the anesthetic drugs used are carefully chosen and specifically calculated based on your pet's age, sex, weight and breed. Safety of your pet is our main concern here at MPCC. Every time a pet is anesthetized there is always some risk involved, but by following specific protocols we feel the risk of anesthesia can be minimized.

EARLY AGE SPAY/NEUTER

Traditionally, we waited until pets were 6-8 months old to schedule their alteration. More recent studies suggest no adverse effects when pets are sterilized at a much earlier age; MPCC offers sterilization surgery as early as 2-3 months of age. The smaller patient size means an easier surgery as well as a quicker recovery.

BOARDING SERVICES

MPCC has a full service boarding facility for dogs and cats. We feed Eukanuba or Science Diet in house, but you can bring your own food if you wish. We strive to make your pet's stay with us as stress free as possible. If your pet has any special needs, please feel free to bring them to our attention and we will do our best to accommodate you. The kennel area is temperature controlled and a sophisticated air exchange system has been installed to reduce the spread of infectious diseases and odors.

CAT BOARDING

\$22.00/NIGHT

Your cat will be secluded in an area away from the main kennels. MPCC has installed "Kitty Condos", which aids in allowing your cat the privacy we know they appreciate. Your cat will need to be up to date on all vaccinations including Feline Bordetella and free from all intestinal parasites.

DOG BOARDING

\$33.00/NIGHT

MPCC has 21 run style kennels to accommodate medium to large dogs and kennels for the smaller breeds. Your dog will be given access to the exercise pad 4 times daily. Your dog must be up to date on all vaccinations, (DHPP-C, Rabies and Bordetella) and parasite/heartworm free. Bordetella cannot be given in the 2 week window prior to admission. Your pet will not be admitted if the above criteria are not met. We also strongly recommend a veterinary approved flea preventive product from May through November. **Daily walks, extra outdoor time, ice cream treats and other VIP services available upon request.**
